Lagos, Nigeria | +234 916 001 7869 | [aakpovire@gmail.com](mailto:aakpovire@gmail.com) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Highly organized project and account professional with a track record of owning client onboarding, cross-team coordination, and delivery tracking end to end — the connective tissue between stakeholders, not just a task-tracker. Comfortable running project management systems (Monday.com, Trello, Jira, Notion) as the single source of truth for status, ownership, and reporting, and building automations (make.com, n8n.io) to keep teams moving faster. Direct experience running client-facing discovery with CEOs, CFOs, and IT decision-makers, catching gaps before they escalate, and closing loops without being chased.

## CORE COMPETENCIES

Client Onboarding & Account Management • Project Management Systems (Monday.com, Trello, Jira) • Cross-functional Coordination • Reporting & Dashboard Accuracy • Automation & AI Tool-Building (make.com, n8n.io) • Client-Facing Communication • Proactive Gap Detection & Escalation • Vendor & Deliverable Tracking

## KEY ACHIEVEMENTS

---

### Business Development Executive | *Excellium* — Lagos, Nigeria

September 2025 – Present

- Own client onboarding end to end — running discovery sessions with CEOs, CFOs, and IT decision-makers to define requirements, then aligning implementation, finance, and technical teams so nothing falls through the cracks during handoff.
- Built and managed a full-cycle pipeline (prospecting through close) across multiple concurrent client accounts, keeping status and next steps current for every one.
- Shaped the evaluation framework for an RFP response to the Lagos State Ministry of Health, coordinating pricing, integration, compliance, and SLA inputs across teams under a fixed deadline.
- Spotted a gap in the company's service offering and closed it by introducing e-invoicing as a new revenue line — without being asked.

### Associate Product Manager | *Vendsr* — Lagos, Nigeria

June 2025 – August 2025

- Ran a 12-week, 6-sprint delivery cycle as the single point of coordination between designers, developers, and business stakeholders, keeping scope and ownership clear throughout.
- Built the product metrics and feedback framework used to track live performance against MVP targets — the same discipline reporting dashboards need to stay accurate.
- Designed and QA'd the merchant onboarding and verification flow before it reached users, catching compliance gaps ahead of launch.

### Project Management Officer (NYSC) | *Mixta Africa* — Lagos, Nigeria

April 2024 – February 2025

- Tracked daily progress against specification across multiple concurrent workstreams and maintained management-ready reporting.
- Coordinated across subcontractors, suppliers, and internal teams to resolve delivery issues before they became timeline risks.

**Product Management Intern, Betechified (Lagos, Nigeria)** — June 2024 – April 2025. Ran structured feedback and testing cycles, converting results into a prioritized, trackable backlog for the delivery team.

## EDUCATION & CERTIFICATIONS

---

B.Sc. Building — University of Lagos, Nigeria (2016 – 2023)

Certifications: Certified Associate in Project Management (CAPM); IBM Data Fundamentals; Product Management (Axia Africa); Business Development (Saylor Academy); Software Engineering — CS302 (Saylor Academy); Digital Marketing (HubSpot Academy); Email Marketing (HubSpot)
